

A Traditional Approach

Hailing from a time where bloodletting and leeching were literally bleeding edge technology, Dr. Corvid is an elite, highly trained doctor of medicine. The renaissance collision of new scientific knowledge and long held traditions resulted in intuitive and effective treatment methods.

Selfless Commitment

Avian Expertise

The plague doctors of old Anglia have a strict philosophy, and a practice that ensures they are committed to seeking the best outcomes for the worst problems. The anatomical frame of Anglic plague doctor does not respond strictly to a single mind, but rather ascendent masters of medicine from the fifth resonant plane, sharpened avian souls acquainted with the workings of Earthly flesh beings, but void of human disgust or reluctance. Dr Corvid is not a human. Dr Corvid is a vessel that contains the wisdom of millenia. Many souls may feasibly be available through our one Doctor, Dr. Corvid.

Find Us

To locate the clinic, one must slip into an alternate timeline around this area of Illinois, which you've probably already found. It's here:

DR. CORVID'S CLINIC

GENERAL SPECIALIST FROM ANOTHER TIMELINE. TRADITIONALIST. NOT A VULTURE.

Drugs. Drugs? Drugs! We Got 'Em. Wellness is overrated. Self medication is weak. We got the real stuff.

We Do Walk Ins

Just wander up! Like, whatever. Don't even Sign in. Got cash? Cool. Don't? We'll get to that.

We Fill Prescriptions

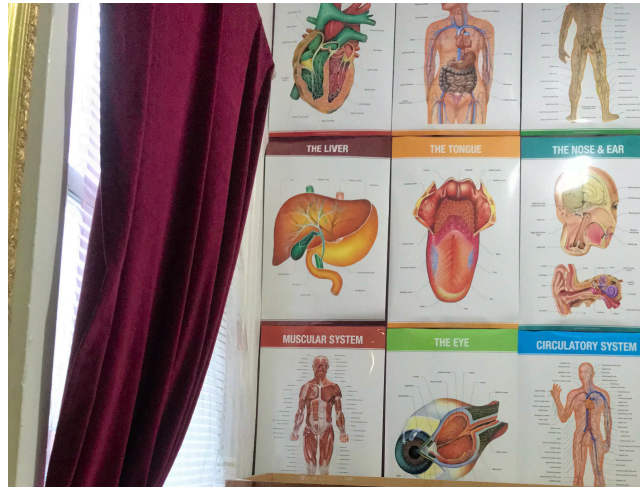

Brands, Generics, Home blends, herbal remedies, we got all that in stock and more.

We Sell Insurance

I did this whole spiel in the video already and don't have a new bit about insurance companies.

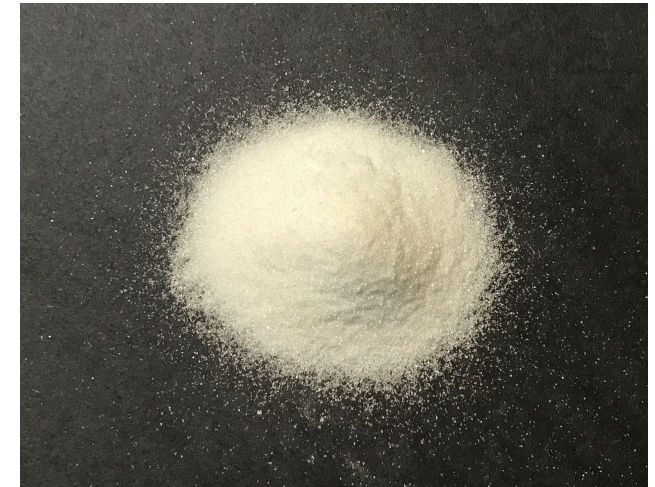

We Get You Real High

We will elevate your senses to the highest plane you can reach with physical tangible substances.

Accomodating Environment

Like a beak full of sweet smelling herbs, our clinic's atmosphere will help provide reprieve from the noxious miasmas of the outside suburban hellscape you freely chose to buy a fucking house in just to complain about the effect of our incredibly disparte living conditions caused by the development of these cardboard mcmansions you bought. God, I hate you people. But your desk jobs bleed money so might as well appeal to your lowest common denominator, reality-TV show watching, no washcloth having, 4-ply wadded poorly wiped ass.

Because Neither of Us Care

So, we all know high fructose corn syrup and processed fats, caffiene, alcohol, and lack of sleep and exercise is like 90% of the cause of your problems and exacerbates every possible health issue you could have. But face it, if I tell you that, you're gonna walk right the fuck out of my office and slam a 2-liter of coke and some dollar cheesburgers, drink til you're sick and coffee up to anxiety in the morning. You're gonna tell me it's hard not to do that. You're gonna tell me you hate the texture of water or some dumb suburbanite shit. So fuck you. You want poison? Take it. OD on this shit. Your liver and your heart weren't gonna last long anyway.
